B75 Profile

## BronzoFinestra®

Bronze is one of the oldest metals known to man since the beginning of the Bronze Age over 5,000 years ago. It is considered a "living material", subject to a natural oxidation or weathering and its natural colours range from a copper red fading through golden yellow to end in the different shades of classic browns. It emanates a warmth difficult to match with other metals.

Contemporary architecture is rediscovering the value and beauty of this noble metal, which was the principal performer in windows and doors of representative commercial buildings and residences of the 18th and 19th century.

## Architectural Bronze

**The elegant and sleek lines of FerroFinestra W75 TB are also available in exclusive architectural bronze and run under the system name BronzoFinestra B75 TB.**

This noble profile system was developed for projects with highest prestige demands. With its limitless surface shades, architectural bronze is a living material that gives windows and doors an undisputed charm.

The profile depth of 75 mm allows to accommodate highly energy-efficient insulating glazing up to 52 mm and the fiberglass-reinforced polyamide insulator guarantees excellent thermal insulation, making the system ideal for projects in climatically demanding regions, where energy-saving regulations are extremely high.

The assortment is rounded off by a wide range of exclusive fittings and accessories reproduced from original designs of the modern age. This allows the realization of all common opening types (inside and outside opening) for windows and doors, including tilt and turn windows. The system is available with a flush or overlapping design.

### Features of B75

1. Solid extruded profiles
2. Mechanically fixed rebate gaskets
3. Very slender flush or overlapping sightlines
4. Profiles accommodate high-performance glazing
5. High performance thermal barrier
6. Wide range of square and angular glazing beads
7. Visible and concealed hardware
8. Fixed glazing, single-sash and double-sash, side-hung and bottom-hung windows opening inwards and outwards, top-hung, tilt and turn windows, vertical and horizontal pivoting windows, window and doors opening inwards and outwards
